**Yamaha Roadliner/Stratoliner Lay-down license plate kit (2006-new)**

**Installation instructions**

**Included:**

- 1x lay-down mounting bracket
- 1x License plate frame
- 4x license plate bolts,
- 4x license plate washers
- 4x license plate nuts
- 3x 6mm x25mm mount bolts
- 3x 6mm lock nuts,  
(or 3x lock washers and 3x nuts)
- 3x plastic spacer washers
- 1x rubber cap

-Remove the license plate from the bike

-Using a hex key, remove the 3 bolts holding the license plate bracket to the fender

-From the underside of the fender, put 1 of the 3 supplied 6mm bolts through the bottom center hole, then from the top, install one of the supplied plastic spacers, lock washer and nut, and tighten in place

-Push the supplied rubber cap over this protruding bolt

-Again from under the fender, put the remaining supplied 6mm bolts through the other 2 holes and hold them in place.

-Now install the plastic spacers onto those bolts, followed by the lay-down mounting bracket, then the lock washers and nuts.

-Tighten loosely by hand, then align the bracket to be centered, and even on the fender. Hold it in place, and then tighten the bolts securely.

-Install the top of the license plate and the license plate frame onto the bracket and then behind the plate use the washers and nuts, tightening just by hand.

-Continue to secure the plate to the license plate frame with the bottom 2 holes in the same manner.

-Now hold the plate and frame even on the bracket and tighten all 4 bolts in place.
